Android Developer / Flutter Developer Lahore, Pakistan

KICS UET Oct 2018 - Mar 2019 (5 months)

Android developer Trainee Lahore, Pakistan

It was a 6 month Android development training program. In which i have learned basic and advance concept of android development. During this trainig we have worked on daily assignments and a final project at the end of training and after the project completion and passing the final exam i have got the training compeltion certificate.

## Projects

Nutrition Recommender Android App

Tools: Android Studio, Firebase Database

Nutrition Recommender was my Final Year project. Nutrition Recommender App suggest diet plan based on user's Health issues, Gender, Fitness choices. It also gives detail about different healthy fruits, vegetables and drinks. This App also has a calorie calculator. Nutrition Recommender App uses Firebase database for the storage of user's data and to authenticate user.

### Wii Transport

**Company:** Sigi Technologies

<https://apps.apple.com/pl/app/wii-transport/id1587710761>

**Tools:** Android Studio, Rest api, Google Map Sdk, Dart, Flutter

Wii Transport is a courier delivery flutter app. I have worked with Rest Api, Google Map Api for Places, Routes, Distance and time in this project. It has features like Electronic signature which ensures the safety of user's courier packages. This app is uploaded on Apple Appstore.

### Wii Driver

<https://apps.apple.com/ie/app/wii-driver/id1588731430>

**Tools:** Android Studio, Rest api, Google Map Sdk ,Navigation Graph

Wii Driver is the driver side of Wii transport. This app manages drivers who are signed up in Wii transport to deliver couriers to the users. It has feature like job history, job pool, driver earning managment system, driver's profile. Driver can track user's location who want to send the package or to whom the package will be delivered using google maps and google's direction APIs.
